Mark,
I obtained the raw data for this sample from the lab. This result is real and not a typo. This sample had to be diluted and re analyzed several times.
Regards,
Linda Bonnette

Linda B-

Maybe this will save you some time---

Here is sample ID in SDWIS that caused the high ALE. Sample ID = DWSC3879-4.

Pat,

Below is the latest data from SDWIS (FY 2017, Q4) showing lead ALEs in New Jersey. The one entry is bold is suspected to be a data entry error. Can NJDEP please follow up with the system to help correct the entry?

Thank you,
Dan

Subject: FY17 Q4 Latest Action Level Exceedances (ALEs)

Those in bold are suspected of being data entry errors, due to the level reported and the fact the system did not have a recent history of levels that high. We will need to get back to NJ and NY to correct some of these.
